Simplifying Cybersecurity To Take on Complex Cyber Threats

In a fast-evolving threat landscape where AI is amplifying the speed and sophistication of attacks, legacy security tools can't keep up or meet today's data privacy demands. Seqrite equips businesses to stay resilient with SIA, our GenAI-powered Virtual Analyst and GoDeep.AI, enabling faster detection, smarter response, and stronger protection against emerging threats.

Robust Protection on a Single, Unified Platform

► Data Privacy

Seqrite Data Privacy enables businesses to discover, categorize, and identify sensitive information scattered throughout corporate resources and ensures seamless compliance with data privacy regulations.

► Key Features:

- Intelligent Data Discovery and Classification
- Consent Management
- Data Principal Rights Management
- Automated Privacy Assessments
- Cookie Consent Management
- Data Breach Notifications

► Endpoint Detection & Response(EDR)

Seqrite EDR harnesses advanced AI/ML technology to proactively defend enterprise endpoints against cyberattacks. With Seqrite EDR, you can prevent data breaches, minimize downtime, and strengthen your overall security posture.

► Key Features:

- Contextual Assessment of Telemetry Events
- Automated Real-Time Response Against Adversaries
- Comprehensive Investigation
- Historical Data for Concealed Threats

▶ Mobile Device Management

Seqrite MDM solution eases enterprise BYOD management and allows businesses to provide secure mobile devices to their employees while eliminating the risk of data loss and theft.

▶ Key Features:

- Effortless Zero Touch Enrollment
- Efficient App Distribution and Management
- Well-Organized Kiosk Mode
- Network Data Monitoring

▶ Managed Detection and Response (MDR)

Seqrite MDR delivers remote security to detect and respond to cyberattacks on enterprise assets like servers, networks, cloud workloads, and email accounts. With real-time monitoring, it uncovers critical threats & provides instant alerts for swift action.

▶ Key Features:

- Full-Scale Incident Response
- Expert-Led Root Cause Analysis
- Superior Threat Intelligence and Hunting
- Comprehensive Monthly Reports

▶ Threat Intel

Seqrite Threat Intel is a real-time threat intelligence that enhances cybersecurity with insights from 10M+ endpoints and global sources. STIX/TAXII-compliant, it delivers India-specific intelligence, prioritizes risks, reduces false positives, and enables swift threat response.

▶ Key Features:

- Get India-specific Threat Insights
- Detect Threats from OSINT & Feeds
- Map IOCs for Faster Detection
- Connect with SIEMs, SOARs, & EDRs for auto response

▶ Digital Risk Protection Services (DRPS)

Seqrite DRPS is a SaaS platform that empowers enterprises to detect and monitor online threats before they cause damage.

▶ Key Features:

- Surface, Deep and Dark Web Monitoring
- Domain and Brand Protection
- Social Media Surveillance
- VIP Monitoring
- IT Infrastructure Monitoring
- Third Party Risk Management

▶ Extended Detection and Response

Seqrite XDR leverages unrivaled visibility to uncover hidden threats and adversaries that siloed tools miss.

▶ Key Features:

- Smarter security operations powered by Gen-AI
- Real-Time Threat Hunting
- Advanced MITRE ATTACK[®] Framework-Based Threat Classification
- Cutting-Edge Playbook-Based Automation

▶ Zero Trust Network Access

Seqrite ZTNA enforces a zero-trust security model for employees, contractors, and vendors accessing enterprise applications. It delivers flexible, secure, and uncompromised access control built for today's hybrid workplaces.

▶ Key Features:

- Visual-First Insights in Real-Time
- Contextual and Zero-Trust Access Policy Enforcement
- Easy Agent-Less or Agent-Based Deployment
- Fully Seamless Integration with Existing Ecosystem

▶ Malware Analysis Platform

Seqrite SMAP leverages advanced technology, multi-stage processing, and an extensive malware repository to deliver actionable intelligence to combat viruses, trojans, ransomware, and spyware for superior malware detection and defense.

▶ Key Features:

- Detect and Mitigate Zero-Day Threats
- Anticipate Future Attacks with Obfuscation
- Decode Attack Patterns and TTPs
- Identify Gaps for Security Adjustments

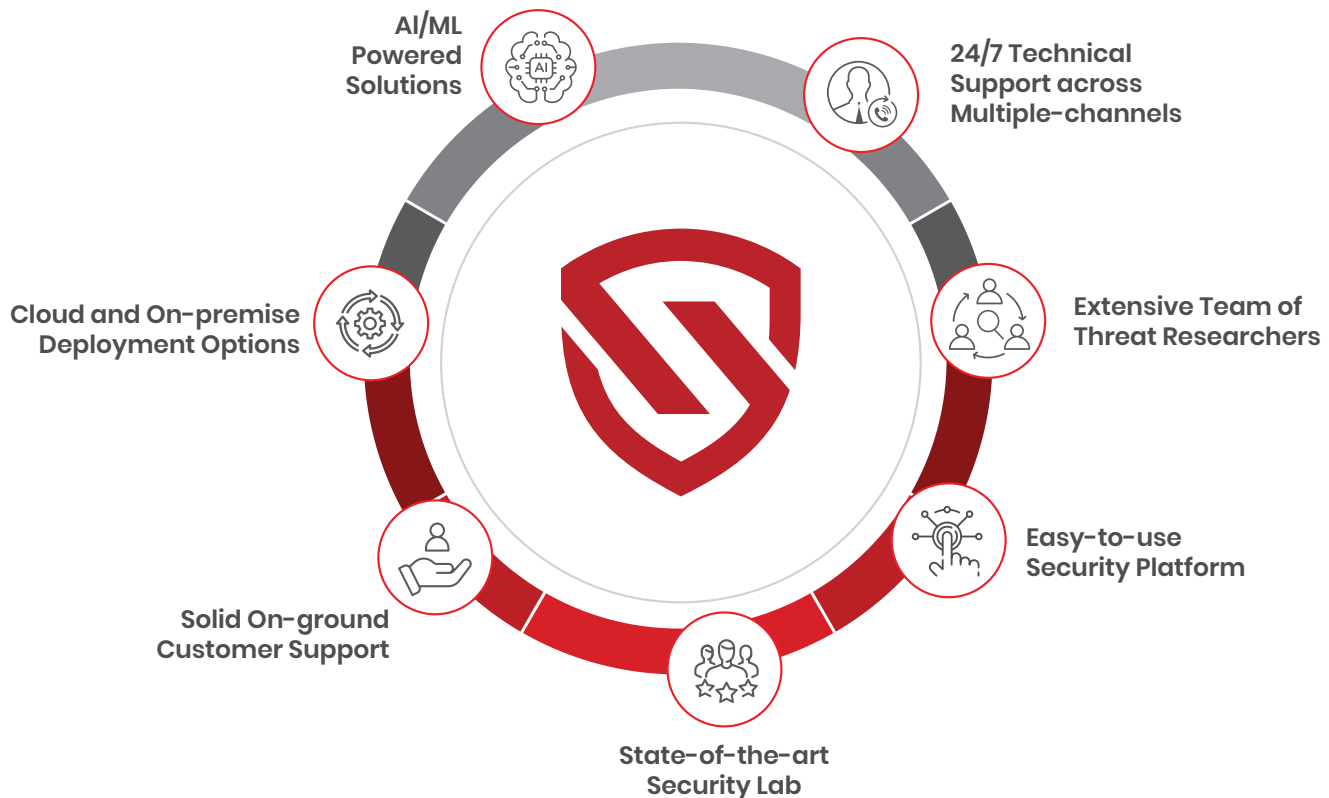

▶ Ransomware Recovery as a Service(RRaas)

Seqrite RRaaS is an expert-led, rapid recovery service that restores encrypted data safely without ransom. With advanced crypt-analysis & secure recovery labs, it helps businesses resume operations quickly and protect assets.

▶ Key Features:

- Attack Vector Impact Assessment
- Advanced ransomware decryption tools
- Leverage Quantum Computing
- Automated Data Recovery
- Post-Incident Recovery Recommendations

Experience The True Value of Cybersecurity

About Seqrite

Seqrite is the enterprise arm of India's leading cybersecurity company Quick Heal Technologies. By leveraging over 30 years of technology expertise, we offer 360-degree protection that goes beyond your endpoints, cloud workloads, applications, and data to secure your business and ensure compliance with industry regulations.

Quick Heal Academy

Quick Heal Academy is a future-ready cybersecurity learning powerhouse that equips students, professionals, and enterprises to outsmart evolving threats. We partner with universities and organizations to deliver industry-aligned training: online, classroom, and through customised corporate programs, empowering teams to tackle today's evolving cyber threats with confidence and expertise.
