SEQRITE
Endpoint Security Cloud

SEQRITE

Simple, comprehensive cloud based endpoint security for workstations, laptops and servers.

Seqrite Endpoint Security Cloud is a simple and comprehensive platform that lets you manage the security for multiple endpoints remotely from anywhere. Whether you're on the move, at work or at home, Seqrite EPS Cloud ensures complete security with easy manageability. It offers a wide range of advanced features like Advanced Device Control, DLP, Web Filtering, Asset Management etc. to ensure complete security and enforce control.

Datasheet

Why SEQRITE
Endpoint Security Cloud?

1

Comprehensive Cloud based Endpoint Security and Control

Seqrite Endpoint Security Cloud is a simple yet powerful platform which requires no hardware/software and can manage endpoint security directly from the cloud. It helps to enforce control over web access, data with a wide range of features such as Advanced Device Control, DLP, Asset Management, etc.

2

Multi-layered Protection

Seqrite Endpoint Security is certified by various industry certifications and integrates innovative technologies like Advanced DNA Scan, Behaviour Detection, Anti Ransomware to protect your system from malware and advanced threats at different levels.

3

Less Technical Expertise to Manage Endpoint Security Solution

It does not need a dedicated technical staff to manage the security solution. It is hosted on cloud and gets upgraded automatically requiring no resource involvement and technical expertise. It provides faster delivery of product upgrades which automatically gets rolled out to endpoints.

4
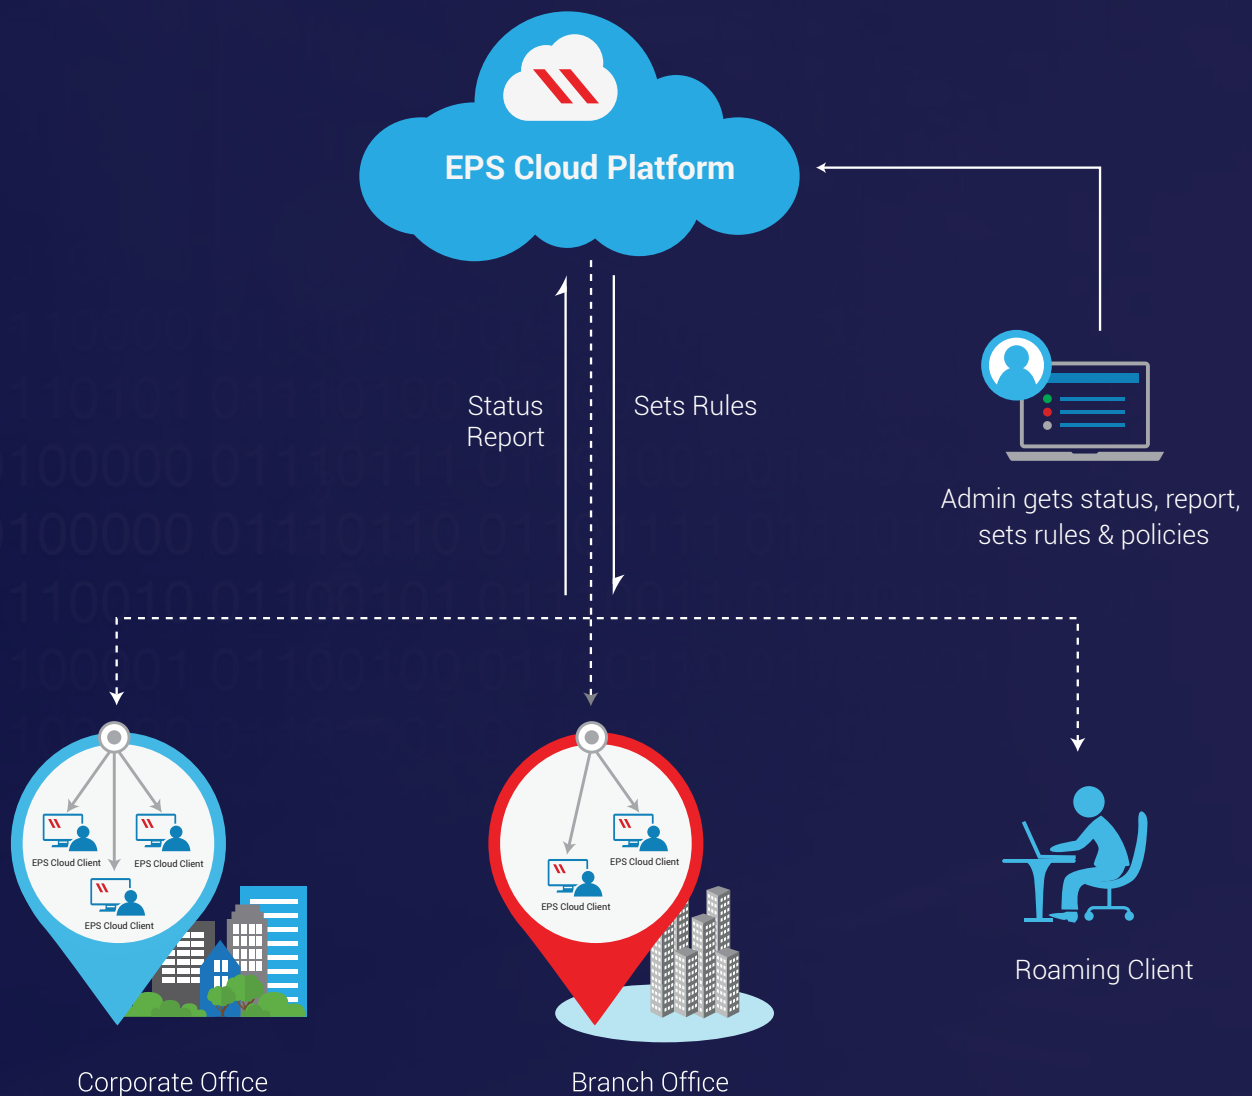

Centralized Management and Control

User friendly interface for monitoring, configuring and managing systems in the network with detailed report and graphical dashboard.

Feature Description

Core Protection

Antivirus
Offers malware protection that is certified by leading industry certifications

Anti Ransomware
Protects from ransomware attacks and automatically takes backup of files.

File Sandboxing
Integrate with SEQRITE Cloud Sandbox to analyze suspicious files for malwares. No reason to buy and operate hardware or software for Malware Analysis.

Web Protection

Browsing Protection
Blocks malicious sites.

Phishing Protection
Blocks phishing sites.

Web Filtering
Blocks sites as per its categories.

Scheduled Internet Access
Schedule time based internet access.

Google and YouTube Access Controller
Blocks Personal and allows Corporate Google Access based on the administrator's chosen account domains. Blocks YouTube Videos depending on the Content Category, Publisher Name, etc.

Network Protection

IDS/IPS
Detects malicious network activities to exploit application vulnerabilities and blocks intruder attempts.

Firewall
Monitors inbound and outbound network traffic based on rules.

Device Control and DLP

Advanced Device Control
Enforce policies regarding the use of storage devices, mobile and portable devices, wireless devices, network interfaces connected to endpoints.

Data Loss Prevention
Prevents data loss by monitoring confidential and user defined data shared through removable devices, network or various applications.

Application and Asset Management

Asset Management
Gives total visibility of hardware and software running on endpoints and also helps to track software / hardware changes happening on endpoints.

Tune-up
Clean junk files and delete invalid registry/disk entries to improve performance of endpoints.

Application Control Safelist
Restricts application access based on Zero Trust methodology. Allows defining application permissions depending on the Operating System, including default OS and SEQRITE applications. Offers a 'Monitoring Only' mode to record application access for administrative viewing without blocking it.

Feature Description

Management and Control

Vulnerability Scan

Provides summarized view of vulnerabilities as per severity

Cloud Based Administration

Cloud based administration with graphical dashboard, group and policy management, email notification, easy deployment.

Application Control

Enforce control over the use of unauthorized applications within the network.

3rd Party App Remover

EPS Agent installation ensures effortless migration to SEQRITE EPS by removing earlier AVs on endpoints, thereby reducing the unprotected time duration.

Migration from EPS v7.6

Facilitates migration of Endpoints, Users, Groups, and Policies to the new EPS Server setup. It also allows migration in batches/groups of endpoints.

Monitoring and Control

Patch Management

Centralized patch management solution to patch vulnerabilities of Microsoft and non-Microsoft applications.
