

Seqrite Ransomware Recovery as a Service (RRaaS)

Restoring your data. Rebuilding your operations. Reinforcing your resilience

Ransomware Is Breaking Business Continuity Faster Than Teams Can Recover

Ransomware today is engineered to cause maximum disruption. Attackers target backups, encrypt business-critical systems, and disable recovery points.

The result is immediate operational paralysis:

- Encrypted or inaccessible data
- Compromised backups
- Business downtime that grows costlier every hour
- Regulatory and legal exposure
- Loss of customer trust and reputation

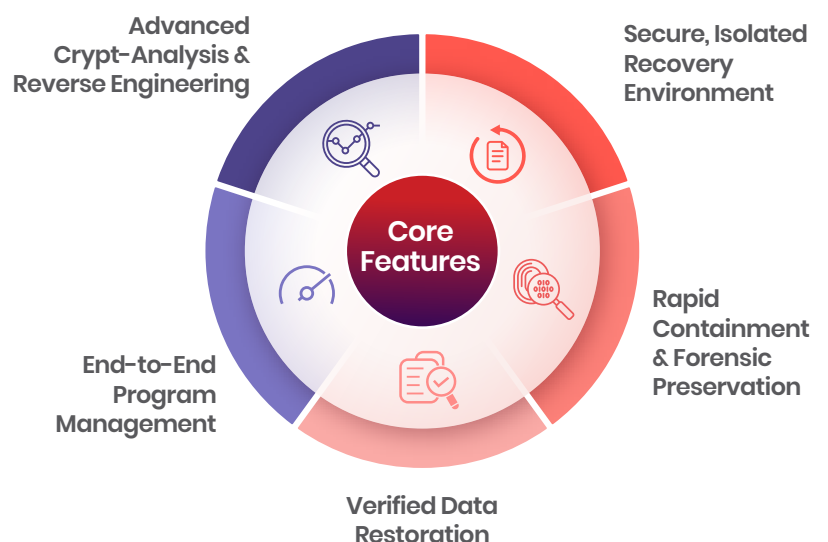

Get Expert-Led Recovery That Doesn't Depend on Paying Ransom

Seqrite Ransomware Recovery as a Service (RRaaS) offers a specialized, forensic-grade recovery process that safely and quickly restores encrypted files.

Our experts combine advanced crypt analysis, custom recovery tooling, and isolated restoration workflows to recover data without negotiating with attackers.

RRaaS transforms ransomware incidents from uncontrolled disasters into structured, manageable recovery operations.

Fast, Secure, and Clean Recovery

Real Business Outcomes: Faster Recovery, Zero Ransom, Stronger Resilience

Faster Return to Business

Accelerated recovery reduces downtime, restores services quickly, and prevents operational bottlenecks.

Zero Ransom Dependency

You regain your data without funding attackers or risking further extortion.

Lower Financial & Reputational Damage

By restoring systems faster and controlling the incident, you prevent losses that typically escalate with prolonged outages.

Safer, Clean Recovery

Validated restoration prevents reinfection, ensuring business systems resume without hidden risks.

Stronger Cyber Resilience

A detailed post-incident analysis enhances preparedness, strengthens defenses, and reduces future recovery time.
