

Comprehensive cloud-based endpoint protection for workstations, laptops and servers.

Seqrite Endpoint Protection Cloud is a simple yet powerful platform that lets you remotely manage multiple endpoints from anywhere. It ensures complete security with easy manageability, whether on the move, at work, or at home. It offers a wide range of cutting-edge features like Advanced Device Control, DLP, Web Filtering, Asset Management, etc., to ensure complete security and control.

Why Seqrite Endpoint Protection Cloud?

1

Comprehensive Cloud-based Endpoint Protection and Control

Manages corporate endpoints directly from the cloud without any hardware and helps to enforce control over web access and data with a wide range of features such as Advanced Device Control, DLP, Asset Management, etc.

2

Multi-layered Protection

Recognized by various industry certifications, it integrates innovative technologies like Advanced DNA Scan, Behaviour Detection, and Anti Ransomware to protect your system from malware and advanced threats at different levels.

3

No Technical Expertise Needed

The cloud-hosted solution is upgraded automatically, requiring no resource involvement and technical expertise. It provides faster delivery of product upgrades, automatically rolling out to endpoints.

4

Centralized Management and Control

Has a user-friendly interface for monitoring, configuring, and managing multiple systems in the network with detailed reports and a graphical dashboard.

One Platform Solving Many Problems

Seqrite Endpoint Protection Cloud

Feature Description

Core Protection

Antivirus

Offers malware protection that is certified by leading industry certifications.

Anti Ransomware

Protects from ransomware attacks and automatically takes backup of files.

File Sandboxing

Integrates with Seqrite Cloud Sandbox to analyze suspicious files for malware, eliminating the need for additional hardware or software for Malware Analysis.

Web Protection

Browsing Protection

Blocks malicious sites.

Phishing Protection

Blocks phishing sites.

Web Filtering

Blocks sites as per its categories.

Scheduled Internet Access

Allows scheduling time-based internet access.

Google and YouTube Access Controller

Blocks Personal and allows Corporate Google Access based on the administrator's chosen account domains. Blocks YouTube Videos depending on the Content Category, Publisher Name, etc.

Network Protection

IDS/IPS

Detects malicious network activities that exploit application vulnerabilities and blocks intruder attempts.

Firewall

Monitors inbound and outbound network traffic based on rules.

Device Control and DLP

Advanced Device Control

Permits policy enforcement regarding using storage devices, mobile and portable devices, wireless devices, and network interfaces connected to endpoints.

Data Loss Prevention

Prevents data loss by monitoring confidential and user defined data shared through removable devices, network or various applications.

Application and Asset Management

Asset Management

Gives total visibility of hardware and software running on endpoints and also helps to track software/hardware changes happening on endpoints.

Tune-up

Helps clean junk files and delete invalid registry/disk entries to improve endpoints' performance. Allows scheduling time-based internet access.

Application Control Safelist

Restricts application access based on Zero Trust methodology. Allows defining application permissions depending on the Operating System, including default OS and Seqrite applications. Offers a 'Monitoring Only' mode to record application access for administrative viewing without blocking it.

Feature Description

Management and Control

BitLocker Encryption Management for Data Security

Allows central management of BitLocker encryption policies, keys, and recovery options, ensuring robust data security and compliance with regulatory requirements.

Monitoring and Control

Patch Management

Offers centralized patch management solution to fix vulnerabilities of Microsoft and non-Microsoft applications.

Management and Control

Vulnerability Scan

Provides summarized view of vulnerabilities as per severity.

Cloud Based Administration

Offers cloud-based administration with a graphical dashboard, group and policy management, email notification, and easy deployment.

Application Control

Lets enforce control over the use of unauthorized applications within the network.

3rd Party App Remover

EPP Agent installation ensures effortless migration to Seqrite Endpoint Protection Cloud by removing earlier AVs on endpoints, reducing the unprotected time duration.

Migration from EPP v7.6

Facilitates migration of Endpoints, Users, Groups, and Policies to the new EPP Server setup. It also allows migration in batches/groups of endpoints.
