# Overview

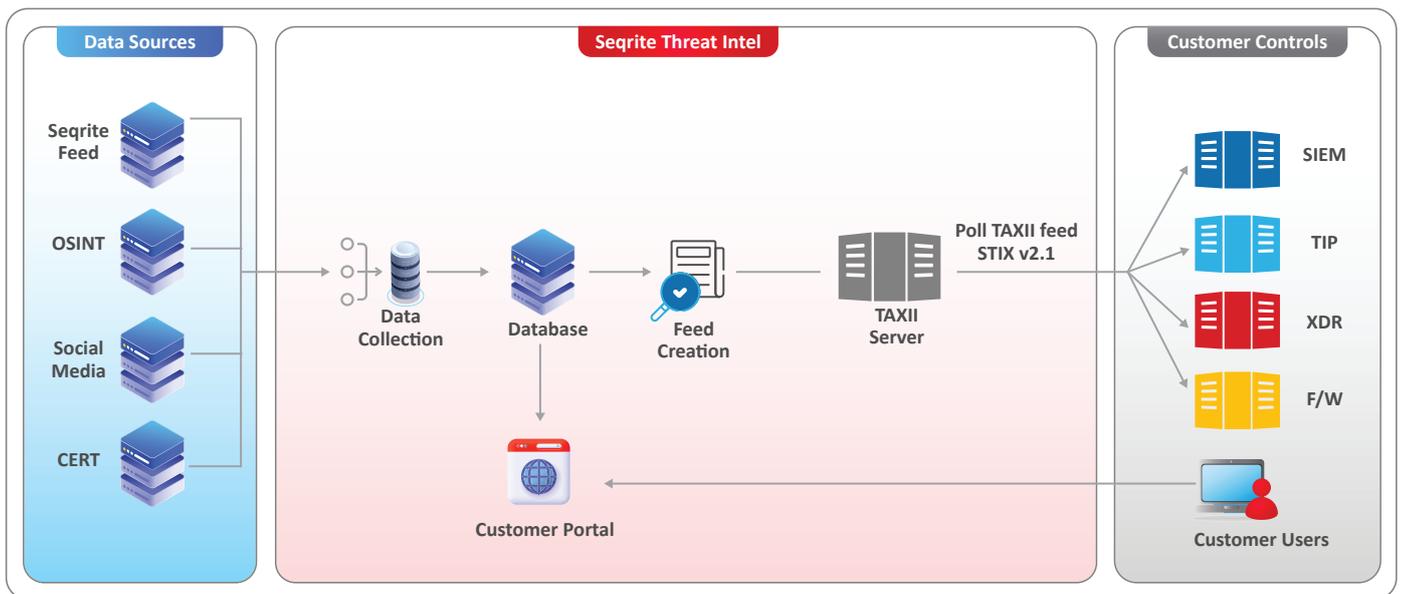

Seqrite Threat Intelligence is an advanced cybersecurity solution designed to provide real-time visibility into emerging cyber threats powered by Seqrite Labs, India's largest and most trusted source of threat intelligence. This threat intelligence helps businesses operating in highly regulated environments to proactively detect, analyze, and mitigate cyber threats.

# Seqrite Threat Intelligence Architecture

Built for resilience – Seqrite Threat Intelligence enhances your threat posture with advanced, contextual, and timely cyber intelligence.

# Key Capabilities

Comprehensive architecture enabling ingestion, enrichment, correlation, and actionable threat dissemination.

## Real Time, Enriched and Contextualized Global and India specific IOCs

Gain actionable intelligence from Seqrite's 10 million endpoints, telemetry data, and global threat feeds. Gain real-time enriched and contextualized insights into both Indian and global cyber threats, ensuring comprehensive threat coverage.

## Risk and Confidence Score to IOCs

Prioritize the IOCs which are risky to an organization

## MITRE Mapping

MITRE Mapping helps identify the Tactics, Techniques and Procedures that are adopted by Threats.

## Indicate the Inactive IOCs

Organizations can stop tracking the IOCs which are no longer active.

## Adversaries (Threat Actors, APTs, Campaigns)

Detailed information about threat actors, their identity, behavior, tactics, and objective.

## Vulnerabilities Intelligence

Vulnerability intelligence provides insights into newly discovered vulnerabilities, including severity, exploitability, and affected systems.

## Reports (RSS feeds, Blogs)

Provides timely updates on emerging threats.

## STIX / TAXII v2.1

Supports STIX/TAXII formats for seamless threat intelligence sharing across platforms and organizations.

## Insightful Dashboards

Features an intuitive dashboard with visualizations and widgets for easy monitoring and analysis of threat data. Offers visualizations and widgets for easy monitoring of threat data and trends.

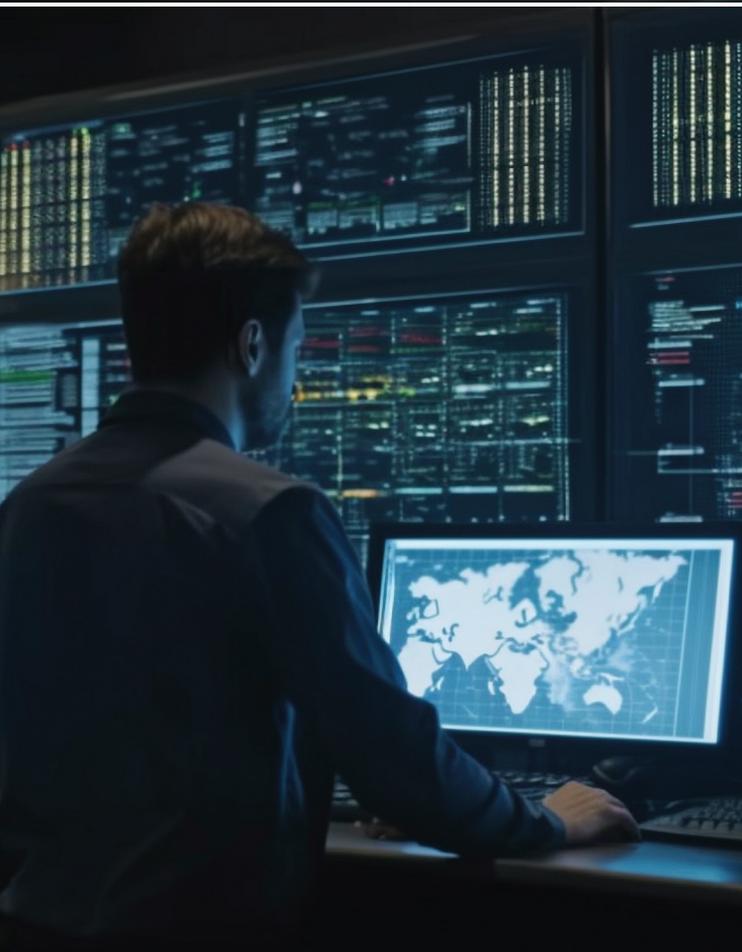

## Role-Based Access Control

Provides multi-user support with different access levels, ensuring secure access to threat intelligence.

## Advanced Search & Lookup

Allows searching by IOCs, threat actors, vulnerabilities by their severity levels for quick threat analysis.

# Benefits of Seqrite Threat Intelligence

## Comprehensive Threat Intelligence Feed

Aggregation and processing of diverse feeds, including Seqrite Telemetry, CERT-IN, MITRE and other reliable feeds.

## Enhanced Decision-Making & Reduced Operational Risk

Swiftly identify and prioritize cyber threats, enabling effective Incident response efforts. Seqrite Threat Intelligence will also help proactively identify and mitigate advanced cyber threats, minimizing potential damage.

## Industry-Specific Contextualization

Tailor threat intelligence with Industry-aligned classifications, TTPs, and actor mappings.

## Regulatory Compliance

Help organizations meet security compliance standards with industry-specific threat intelligence.

## India Specific Telemetry

Seqrite Threat Intelligence reports IOCs and Adversary Intel which are relevant to Indian geography and thereby its customers.

## Proactive Defense

Protects brand reputation and customer trust by proactively mitigating risks before they escalate.

## About Seqrite

Seqrite is a leading enterprise cybersecurity solutions provider. With a focus on simplifying cybersecurity, Seqrite delivers comprehensive solutions and services through our patented, AI/ML-powered tech stack to protect businesses against the latest threats by securing devices, applications, networks, cloud, data, and identity. Seqrite is the Enterprise arm of the global cybersecurity brand, Quick Heal Technologies Limited, the only listed cybersecurity products and solutions company in India.

Today, 30,000+ enterprises in more than 70+ countries trust Seqrite with their cybersecurity needs.
