

End of Product Life Policy

Quick Heal Technologies Limited (formerly known as Quick Heal Technologies Pvt. Ltd.) ("Quick Heal") reserves the right to discontinue software products or specific software versions for a variety of reasons, including product due to market demands, technology innovation and development driving changes in the product or the products simply mature over time and are replaced by functionally richer technology or new software releases.

This policy guides the final business operations associated with the product life cycle. The end of product life policy consists of a series of technical and business milestones and activities that, once completed, make a product obsolete. Once obsolete, the product is not sold, renewed, manufactured, marketed, improved, repaired, maintained, or supported.

With that in mind, we have set out below Quick Heal's end of product life policy to help end user better manage their end of product life transition and to understand the role that Quick Heal can play in helping to migrate to alternative Quick Heal product and technology.

The general policy guidelines are:

1. Quick Heal will provide 3 months' notice of the affected product's end-of-sale date and/or the last day when the affected product can be supported. This notice will appear on the Quick heal site at <https://www.seqrite.com/resources/cat/policy/> and we encourage end user to visit this site regularly as it contains useful information regarding Quick Heal's end of product life.

2. Access to Quick Heal customer support will be available 3 months from the end of product life for product issues.
3. Software means the object code versions of the product, together with updates, releases, modifications, and enhancements, owned and provided by Quick Heal to its end users pursuant to the End User License Agreement.

The end of product life milestones are presented in Table below:

Product Description	Software Versions Affected	Product Replacement / Alternatives	End Date
Quick Heal Admin Console 4.1 TS and IS	4.1	Seqrite Endpoint Protection 7.4 and above	30/09/2018
